Open OnDemand Overview

- ✓ About Open OnDemand
 - Recap
 - What's new?
 - Community experience
 - Upcoming and Future

About Open OnDemand

- Open source software project
- Installable for an HPC cluster (or clusters)
 - Standalone system, Lab, Department, University or National Resources
- More than just an “out of the box” solution
 - OnDemand is a platform that can be extended through additional and custom apps

OnDemand Features

- Single point of entry for HPC Center's services
- User needs three things
 - URL: `ondemand.xxx.edu`
 - Username
 - Password
- Zero install (Completely browser based)
- Single sign-on
- Firewall friendly (Keep traffic on https port)

What sort of things can you do with Open OnDemand?

- Access your supercomputer via web
 - File Browser, File Editor: upload/download, browse edit files
 - Terminal: connect to a login node command line
- Manage Batch Jobs via the web
 - MyJobs app: create, submit and inspect individual jobs
 - ActiveJobs app: inspect queues and running job statistics

Open OnDemand Overview

Installation Procedure

<https://osc.github.io/Open-OnDemand/installation>

Installation steps limited to OnDemand server

- Install system dependencies
 - Apache, Ruby, NodeJS, Passenger, git (we use Software Collections)
 - Client libraries for authentication, resource manager, and shared file system access (like any login node)
- Install Open OnDemand infrastructure from GitHub
 - Sets up web server to run apps
- Install Open OnDemand apps from GitHub
 - Dashboard, Shell, Files, Editor, Active Jobs, My Jobs

 - Community experience
 - Upcoming and Future

Open OnDemand Timeline

- 2016Q4
 - OSC OnDemand 3.0 released
 - First usage of Open OnDemand
 - Beta testing at external sites begins
- 2017Q1
 - First public, fully installable release
 - First webinar
- 2017Q2
 - Second webinar

What's new?

- MOTD support
- Simpler installation
 - App installation with a single script
- Interactive Desktop support
 - Linux Desktop (e.g., GNOME, MATE)
 - Custom desktop applications
- Additional resource manager support
 - Slurm
 - LSF

What's new?

Installation Overview

- Motivated by making the process easier
- Found opportunities to make installation smoother and simpler for admins
- Many steps reduced to a single step
- Released on April 27th, 2017

What's new?

Interactive Desktop Demonstration

What's new?

External install and Slurm demo by PSC

Open OnDemand Overview

- ✓ Recap
- ✓ What's new?
- ✓ Community experience
- Upcoming and Future

Community experience

- In addition to PSC, we also have installs at a handful of other locations that we know about
 - If you've tried it and we don't know, please let us know!
- Feedback
 - Resource managers (Slurm & LSF)
 - Theming/Branding
 - 2FA
 - CILogon
 - X11
 - VNC

Upcoming and Future

- PEARC17 BoF – Come meet us!
 - Wednesday, July 12 • 4:00pm - 5:00pm
 - <http://sched.co/Ax2T>
- Upcoming features
 - App development
 - Graphical desktop applications
 - Paraview, MATLAB, Abaqus, ANSYS Workbench, COMSOL Multiphysics
 - Interactive web applications
 - Jupyter, RStudio Server, COMSOL Server
 - New and customized apps
 - Suggestions?

Next Webinar/Staying in Touch

- Our webinars are planned roughly quarterly
 - Let us know what you'd like to learn about next
- Visit our website
 - <https://osc.github.io/Open-OnDemand/>
- Join our mailing list
 - <https://lists.osu.edu/mailman/listinfo/ood-users>
- Get Open OnDemand!
 - <https://github.com/OSC/Open-OnDemand>

Thank you! Any questions?
